

PRODUCT PORTFOLIO

WHO WE ARE

With three decades of established market leadership, Indigo Awnings are now one of the largest suppliers of commercial grade, external shading solutions in the UK.

With a portfolio spanning 30 years, our clients are many and varied; ranging from pub and hotel groups and independent operators right up to the London 2012 Olympics and the RFU 2015 Rugby World Cup.

From concept through to completion, Indigo Awnings provide expert advice with unrivalled customer and after-sales service.

Our service levels are such that some 60% plus of all new business is derived from repeat customers or referrals from previous customers.

Indigo Awnings Ltd is FCA registered and has full Altius Accreditation.

- Moveable bases with concrete slabs
- 30cm² or 50cm² base plates for bolting to an existing concrete slab

FIXED & RETRACTABLE ROOF STRUCTURES

Given virtually the 365 days of use that can be gained with these structures, it is no wonder that the market is moving towards the installation of these at the expense of retractable awnings, they are particularly popular for pubs with a strong food offering, hotels and the casual dining sectors.

Our range offers various roof options including:- Fixed laminated glass, Retractable heavy-duty PVC and Rotating/Retractable louvres.

The retractable versions are operated by remote control as standard and there are a variety of infill options for the sides such as sliding glass doors and vertical blind systems. Heating, lighting and speakers can also be added and on some of the louvered roof options, solar panels can be added to supplement the mains power for operating the unit.

- 01 Pergotex
- 02 Plaza Viva
- 03 Louvered Roof System

AWNINGS

Indigo offer the largest range of high quality, commercial grade awnings in the UK which are manufactured in Germany. With six different models and sizes ranging from 2m width x 1.5m projection up to 12m width x 4m projection, we are confident in stating that we can genuinely cater for any site.

Models up to 5.5m width are available with manual (winding handle) operation, otherwise all models are supplied with electric operation, remote control handset and wind sensor. The latter will automatically put the awning/s away in winds in excess of those recommended by the manufacturers which are a major benefit for any busy outlet.

All models can be powder coated to any one of 56 colours and there are dozens of fabric colours to choose from. The fabric is a solution dyed acrylic canvas which waterproof and guaranteed for 10 years against rotting or fading. It is also highly UV protective. In addition, at a modest premium, we can also offer an eco range which is made from recycled plastic bottle.

Logos and signage can also be applied to the main cover or valances, making the unit totally customisable.

SCREENING

Bespoke screening is designed to give any outdoor space definition.

Our screens, barriers and partitions are available as fabric or fixed glass panels, with the option of LED lighting. All glass used is toughened safety glass with frame work made of powder coated aluminium.
